EFFORTS TO REDUCE RACIAL, ETHNIC, AND ECONOMIC ISOLATION

Below is the description submitted by this school of how it provides educational opportunities for its students to interact with students and teachers from diverse racial, ethnic, and economic backgrounds.

East Haven continues to make reduction of racial, ethnic and economic isolation a major focus. The school district has provided many opportunities for teachers and students to embrace diversity and recognize its value in educating our students. This is evidenced in several ways. Deer Run School and Ferrara School both participate in the Open Choice Program. Through this program, students enter in kindergarten and are eligible to remain through grade twelve. The program has promoted a more diverse educational environment for all. At the East Haven Academy, students celebrate diversity through rich interdisciplinary content including exploration and sensitivity through simulated learning experiences. More than 40 East Haven students and staff are actively involved in the Southern CT Conference Diversity Dream Team Program and the Cooperative International Studies Program who meet regularly with students in both urban and suburban settings. The district has also formed a partnership with international consultant and researcher Naomi Migliacci. She provided staff with professional development on successful strategies for responsive teaching. These PD sessions provided staff the tools to be proactive and responsive to academic and social implications for our diverse student population and their families. This year a district program entitled East Haven C.A.R.E.S. was implemented to help address the needs of our growing Hispanic population. Evening meetings were planned around topics that included how parents can assist their child with reading comprehension, understanding the skills and concepts their child would be learning at each grade level and understanding the process for assessing various kids of social services and community outreach programs. Participants were able to ask questions pertinent to their families and translators were available to ensure everyone was able to comprehend, all sessions were held in their native language.

EQUITABLE ALLOCATION OF RESOURCES AMONG DISTRICT SCHOOLS

Below is the description submitted by this district of how it allocates resources to insure equity and address needs.

The East Haven Board of Education allocates resources in a manner that ensures equity for all students while still maintaining a system that is responsive to the unique need of each school and each student. The budget development process is an inclusive one that allows all member of East Haven's educational community to have a voice. District wide issues such as staffing and curriculum revision initiatives are budgeted to ensure that every student in a particular grade level will be offered a comparable educational experience. For Example, staffing decisions are driven by the goal of equalizing class size at all grade levels across the district. Major investments continue to be made in district wide curriculum initiatives that benefit all students in every one of the district's schools. In addition to district wide funded activities, dollars are allocated on a per capital basis to principals to be used to address the individualized educational needs of their students.

Accommodations for a student's disability may be made to allow him or her to participate in testing. Students whose disabilities prevent them from taking the test even with accommodations are assessed by means of a list of skills aligned to the same content and grade level standards as the CMT and CAPT.

Federal law requires that students with disabilities be educated with their non-disabled peers as much as is appropriate. Placement in separate educational facilities tends to reduce the chances of students with disabilities interacting with non-disabled peers, and of receiving the same education.

SCHOOL DISTRICT IMPROVEMENT PLANS AND ACTIVITIES

The following narrative was submitted by this district.

East Haven has concluded a three year collaborative inquiry Professional development series inclusive of Data Driven Decision Making and Data Teams, Marzano's Effective Teaching Strategies, Common Formative Assessments, and Professional Learning Communities. This professional development initiative has laid the groundwork for our district focus on the implementation of our District's SRBI Strategic Plan. Our November 2nd professional development day was dedicated to professional development activities to support the implementation of the SRBI plan. Breakout sessions were all focused on key elements of the plan and provided staff with valuable learning experiences, information and tools for success. East Haven has partnered with SERC to begin District-wide implementation of Positive Behavior Supports in all our schools. We are committed to improving student academic and behavior outcomes through ensuring all students have access to the most effective and accurately implemented instructional and behavioral practices and interventions possible. Positive Behavior Supports has provided us with an operational framework for achieving these outcomes. Over the next several years, we will develop the framework at all our schools in order to guide the selection, integration, and implementation of the best evidence-based academic and behavioral practices for improving important academic and behavior outcomes for all students. The District-wide Pupil Services Department continues to look for ways to provide special education services for students in the least restrictive environment. An example is the expansion of the programs within the public school setting for students on the autism spectrum. There are now four classrooms serving students from ages 3 through 8 with intensive services and therapies through discrete trial and applied behavioral analysis. It is our intent to utilize the expertise of our special education teachers as a resource for general education. Our district SRBI plan calls for special education and regular education teachers to work in concert to ensure all students are successful.
