EFFORTS TO REDUCE RACIAL, ETHNIC AND ECONOMIC ISOLATION

Below is the description submitted by this school of how it provides educational opportunities for its students to interact with students and teachers from diverse racial, ethnic, and economic backgrounds.

The Trumbull Public Schools have actively sought to provide resources and activities that allow students and staff to interact with members of minority communities. To increase and expand interactions with people of diverse backgrounds, the District has supported the following initiatives: 1) An active district-wide Cultural Diversity committee, representing administrators, teachers and community members, works toward extending an environment where diversity is valued as a source of strength and vitality. The district-wide committee has expanded to include five building level cultural diversity committees, each sponsoring a variety of cultural events at the local level. Inter-district projects allow us to maintain lasting partnerships with surrounding districts. 2) A regional Agriscience and Biotechnology Center, located at Trumbull High School, has enrolled 196 students from nine communities. Thirty-three percent of the students are minority students. 3) Forty-five Trumbull students participated in a regional program for the arts. Fifty-three of our students enrolled in the marine science program at the regional Aquaculture Center in Bridgeport. 4) Approximately fifty-four Project Choice students have become a part of our school system as welcome members of our elementary, middle school and high school communities. 5) Minority candidates for teaching positions are actively recruited from teacher-preparation institutions and through personal contact and recommendations, as well as ensuring these candidates are included in respective interviews. This area must continue to be a priority. 6) All curriculum guides include links and references to diverse cultures and backgrounds, and students and teachers share and celebrate the rich history, traditions and holidays of a wide range of the world's communities.

EQUITABLE ALLOCATION OF RESOURCES AMONG DISTRICT SCHOOLS

Below is the description submitted by this district of how it allocates resources to insure equity and address needs.

In order to allocate resources to ensure equity and address needs: 1) Building administrators, with the assistance of staff members and the recommendations of District curriculum support personnel, develop budgets for their individual schools. All budgets fall within a reasonable parity range. 2) Per pupil allocations, geared to meet the needs of different school age populations, allow building administrators to prioritize and fund the purchase of instructional materials and supplies, print materials, media resources and related professional activities. 3) New textbook adoptions are district-wide, Board of Education approved decisions, funded through a central account that provides the new texts and supplementary resources for all students in all schools. 4) The Board guidelines establish class size for specific grade levels. When projected class size violates guidelines, adjustments are made to meet the needs of the teacher and class. This may involve hiring additional full-time teachers, providing part-time teachers or placing trained paraprofessionals in the classroom.

Accommodations for a student's disability may be made to allow him or her to participate in testing. Students whose disabilities prevent them from taking the test even with accommodations are assessed by means of a list of skills aligned to the same content and grade level standards as the CMT and CAPT.

Federal law requires that students with disabilities be educated with their non-disabled peers as much as is appropriate. Placement in separate educational facilities tends to reduce the chances of students with disabilities interacting with non-disabled peers, and of receiving the same education.

SCHOOL DISTRICT IMPROVEMENT PLANS AND ACTIVITIES

The following narrative was submitted by this district.

The district utilized the State SRBI Framework to focus improvement plans and activities. All district staff received professional development on the definition and use of SRBI so they could begin to understand how it would function in their content area. While all three tiers of the framework are important, emphasis was placed on Tier I. By providing a strong Tier I core curriculum, we maximize all students' opportunities for academic success. Tier I Full day Kindergarten was implemented for the first time, providing a strong academic, behavioral, and social-emotional foundation for our youngest students. Foundations phonics/word study program was again implemented in Grades K-2. The Fountas and Pinnell Benchmark Assessment system was implemented in Grades K-8 as a consistent approach to administering and analyzing reading records. A K-12 student assessment database was created to track the longitudinal progress of all students. Monthly subject-based District Articulation Committee (DAC) meetings focused on curriculum, instruction and assessment in transition grades 5-6 and 8-9. This allowed for improvements in our curriculum alignment and consistent use of instructional best practices. A Tri-State gallery walk validated our efforts in creating engaging, authentic Assured Performance Based Assessments (APBAs). Professional learning activities continue to support staff efforts to grow, to explore, to innovate and to use their skills to enhance student learning. Tier II/Tier III The Leveled Literacy intervention (LLI) program was implemented to serve the needs of struggling readers in Grades 1-3. The Wilson Reading Program continues intervention efforts for struggling readers in Grades 3-8. Trumbull High School continues the use of the Read 180 lab for computer-based instruction focused on specific reading skills. The district's K-5 Math Program Leader analyzed universal screen, diagnostic, and progress monitoring assessments for future use by classroom teachers and elementary math specialists. Trumbull High School students utilized PLATO Learning computer programs to access online assessments and tutorials in mathematics, science, social studies, and language arts. It is used in our summer school program with students in grades 6 through 12. Staff is available at all levels to provide interventions via both push-in and pull-out models.
