EFFORTS TO REDUCE RACIAL, ETHNIC, AND ECONOMIC ISOLATION

Below is the description submitted by this school of how it provides educational opportunities for its students to interact with students and teachers from diverse racial, ethnic, and economic backgrounds.

While Seymour Public Schools is not as diverse as some neighboring districts, this learning community works diligently in their efforts to reduce racial, ethnic and economic isolation. Our mission is to educate and inspire all students, to enrich their experiences, and to prepare them to meet the challenges of an ever changing world. In pursuit of our mission, we believe that all students can learn and that they have individual interests and talents that need to be nurtured in a physically and emotionally safe environment. We also value creativity, inquiry and self-direction in the learning process. Through curriculum, enrichment activities, school-based clubs and inter-district sister school grants, the Seymour Public Schools continue to educate our students in cultural, ethnic, and religious diversity. Each school in the district has school based clubs and activities that benefit the less fortunate throughout the year. School organizations range from the well organized high school HOPE (Helping Other People and the Environment) Club to individual class projects that benefit the less fortunate. These clubs and individuals contribute food, clothing, holiday presents and financial assistance for various individuals and causes throughout the school year.

EQUITABLE ALLOCATION OF RESOURCES AMONG DISTRICT SCHOOLS

Below is the description submitted by this district of how it allocates resources to insure equity and address needs.

The Seymour Public School budgeting process has become completely transparent to all community stakeholders. The annual budgeting process begins in November of each school year. The Central Office staff begins by working with each individual building principal to assess their needs as related to their school improvement plans as well as the District Strategic Plan. Throughout December and January, Central Office develops a Superintendent's recommended budget that is then brought to the Finance sub-committee of the Board of Education. In addition, solicitation of input from the parent community is obtained through a series of scheduled "community conversations", whereby budget direction and various initiatives are discussed prior to formal budget preparation. The conversations take place in the context of long term goals and initiatives, with an emphasis on the linkage to the district strategic goals and the impact on student learning. Upon completion of the needs identified, information is presented to various stakeholders at formal meetings during the annual budget process. Once the formal budget is completed and filed at the town hall; the entire budget is posted on the district website for the public to view and provide feedback. The budget process concludes with the passage of the education budget referendum.

Accommodations for a student's disability may be made to allow him or her to participate in testing. Students whose disabilities prevent them from taking the test even with accommodations are assessed by means of a list of skills aligned to the same content and grade level standards as the CMT and CAPT.

Federal law requires that students with disabilities be educated with their non-disabled peers as much as is appropriate. Placement in separate educational facilities tends to reduce the chances of students with disabilities interacting with non-disabled peers, and of receiving the same education.

SCHOOL DISTRICT IMPROVEMENT PLANS AND ACTIVITIES

The following narrative was submitted by this district.

The Seymour School District continues to operate under the guidance of its Strategic Plan which consists of three goals. Goal One is the development and implementation of a well articulated Pre-K through grade twelve curriculum that identifies knowledge and skills along with appropriate instruction and assessment strategies. To this end the District has created and continues to fund the position of Director of Instruction K-8 as well as the addition of content area department chairs/coordinators at the secondary level. Presently, curriculum is accessible to district staff through an electronic format. Reader's Workshop is the model of instructional delivery for Language Arts in grades K-5. Our teachers are in the process of being trained by experts in the field of reading instruction through an embedded professional learning process. As a district we are working to align our existing curriculum with the Common core State Standards. Voyages, a math program, which is based on the State of Connecticut Mathematics Frameworks continues to be used in the three elementary schools in grades K-5. Foss Science kits are used in grades K through 8. Seymour Middle School's schedule is designed to include a Language Arts block as well as the opportunity to take Spanish during 7th and 8th grade. Seymour High School continues to add to their list of AP courses with the approval of AP Environmental Science, AP Comparative Government and AP Chemistry. Seymour continues to focus on the instructional core; teachers utilize Common Formative Assessments to inform instruction. A District Data Team was created and trained to address our goal of continuous improvement and student achievement. Building Data Teams and grade level data teams function in each school building. This model will provide the district with a laser like focus on teaching and learning for school improvement district wide. Goal Two of the Strategic Plan is the redefining and recreating of the learning environment (instructional approaches, technologies, and resources) in ways that incorporate emerging understanding of how students learn and how technology is changing the way our students engage with the world. The district has in place a fiber network and a replacement plan for hardware and software. The professional development needed to fully make this shift is on going. Goal Three of the Strategic Plan is to improve internal and external communication in order to unite parents, educators, students and the community in working collaboratively to achieve our mission and goals for learning. In order to facilitate communication with the parent population as well as the community, Seymour has a District webpage and additionally each teacher is required to have their own webpage. School employees are also able to communicate with parents through the email system. Each teacher has access to a phone in the classroom to communicate more readily with parents. Parents are able to access information on their child's academic progress in grades 6-12 via Edline. The Superintendent holds regular community conversations for parents and the community.
