EFFORTS TO REDUCE RACIAL, ETHNIC, AND ECONOMIC ISOLATION

Below is the description submitted by this school of how it provides educational opportunities for its students to interact with students and teachers from diverse racial, ethnic, and economic backgrounds.

Throughout the 2007-08 school year, the Hartford Public School District provided numerous opportunities for students and staff to participate in programs designed to reduce racial, ethnic and economic isolation. The number of students attending inter-district magnet schools increased significantly providing opportunities for Hartford students to attend classes with students from diverse backgrounds. Additionally, Hartford students attend University of Hartford Multiple Intelligences Magnet School, Two Rivers Magnet Middle School, Metropolitan Learning Academy, and Great Path Magnet School where they are able to interact on a daily basis with students from diverse racial, ethnic and economic backgrounds. Other initiatives include participation of over one thousand Hartford students in the Open Choice Program. The Open Choice program provides opportunities for students to attend school in districts outside of Hartford. In addition to Magnet and Choice programs, programs that were initiated as pen pal initiatives have expanded to become sister school programs with students spending quality time at their sister school. Many elementary schools are involved in sister school programs and the number of students participating continues to increase. Hartford students enjoy the opportunity to interact with other students in thirty-seven diverse school districts. Further, a large number of district students enrolled at district schools actively participated in inter-district grant programs. Students participated in intra-district programs such as Holcomb Farms, Link and Learn and Nature's Classroom. Other district programs include the Dual Language with approximately 2000 students participating at six elementary schools. The Hartford District curriculum emphasizes multicultural perspectives in English, Social Studies and the Arts. The English Curriculum includes Hispanic women authors, African-American and Latino writers in required English Courses; the Social Studies Curriculum includes the infusion of multicultural themes and content on all grade levels as well as programs designed to increase tolerance and respect for ethnic diversity. The Art Curriculum includes multicultural music as well as the Art Connections Program that develops student connections between art works and various world cultures.

EQUITABLE ALLOCATION OF RESOURCES AMONG DISTRICT SCHOOLS

Below is the description submitted by this district of how it allocates resources to insure equity and address needs.

All schools in the Hartford Public School District receive comparable resources within existing financial limits. The district budgeting process begins at the school site level involving administrators, staff and school improvement teams. Each school site assesses its need with supporting evidence that considers factors such as instructional improvement, student population, student performance, condition and age of facilities and fiscal equity among all schools. In addition, the Superintendent of Schools reviews and approves budget requests and recommendations prior to presentation of the budget to the Board of Education. School staffing is established using closely monitored enrollment numbers and class size standards based on grade level. The official October 1 enrollment data is then used to establish the per pupil allocation. This allotment is the base level of support and it is used for discretionary school expenditures, which include textbooks, instructional supplies, software programs and other items needed to effectively managing a school. The School Superintendent closely monitors the implementation of all educational programs.

Accommodations for a student’s disability may be made to allow him or her to participate in testing. Students whose disabilities prevent them from taking the test even with accommodations are assessed by means of a list of skills aligned to the same content and grade level standards as the CMT and CAPT.

Federal law requires that students with disabilities be educated with their non-disabled peers as much as is appropriate. Placement in separate educational facilities tends to reduce the chances of students with disabilities interacting with non-disabled peers, and of receiving the same education.

SCHOOL DISTRICT IMPROVEMENT PLANS AND ACTIVITIES

The following narrative was submitted by this district.

The primary focus of the Hartford School District is student academic achievement. There are various measures of student academic accomplishments including Connecticut Mastery Test (CMT) and the Connecticut Academic Performance Test (CAPT). Results of the CMT illustrate continued academic growth and improvement not only among the number of students scoring at the proficient level and above, but also among the number of students moving upward from lower levels. Results of district formative assessments inform teaching and learning and result in initiatives to improve academic performance. Supplemental programs are in place to reinforce academic skills in reading and mathematics. Summer programs offer a rigorous curriculum to over six thousand students who attend summer school. Sustained improvements to increase student achievement are also evident by curricular initiatives that include revised curricula in many areas. Students who attended the Pre School Program scored higher than other students on the kindergarten assessment. Data reveal that kindergarten students completing the Early Learning Program are better prepared to enter first grade and possess greater grade level reading skills. Results of the CAPT test also illustrate some improvement in student performance as demonstrated by the growing number of students scoring at the proficient level and above, particularly in the area of Writing. A sustained initiative in at the secondary level resulted in an increase in the number of students taking Advanced Placement Courses at the high schools as well as the number of students taking the national Advanced Placement Tests. Advanced placement courses are offered in English, Biology, American History, European History, Western Civilization, Calculus and Psychology. The number of students graduating from district high schools continues to increase each year, as does the number of students receiving honors and scholarships. Nearly eighty percent of graduates intend to pursue post-secondary education in two or four year colleges.
