### EFFORTS TO REDUCE RACIAL, ETHNIC, AND ECONOMIC ISOLATION

---

Below is the description submitted by this school of how it provides educational opportunities for its students to interact with students and teachers from diverse racial, ethnic, and economic backgrounds.

Brooklyn is a small town with very little racial diversity. However, its economic diversity is evidenced by the percentage of students eligible for free/reduced price meals. Hence the issue of economic isolation and fragmented families is an ongoing concern to members of our staff. At the elementary level, we work to address the limitations in the lives of many of our students through a variety of curricular projects to provide opportunities for students to experience other cultures and field trips to enrich and broaden their perspective.

At the middle school level, the many cultural enrichment activities throughout the year in language arts, social studies and science help to broaden students' understanding of the differences and the similarities of different ethnic groups and also help to develop an appreciation of the traditions of other cultures. The faculty has incorporated diversity into their instructional activities and our field trip program provides opportunities for students to interact with students from other schools. Examples of this are: music festivals at the University of Connecticut; the Legacy Exploration Program at UCONN; and trips to the Hyde Cultural Center in Woodstock, CT.

Our secondary students are tuitioned to a number of high schools in eastern Connecticut under the Board's Freedom of Choice policy and thus have access to a broad range of programs/activities and become members of student bodies with much more diversity than is possible in Brooklyn. Within the scope of their experience in our designated high schools, our secondary students have the opportunity to learn about, interact with and respect members of different ethnic, racial and economic backgrounds and cultures.

**EQUITABLE ALLOCATION OF RESOURCES AMONG DISTRICT SCHOOLS**

---

Below is the description submitted by this district of how it allocates resources to insure equity and address needs.

The Board of Education's policy on the allocation of district resources provides the framework for both expenditures and revenues and translates into financial terms the priorities and education needs of the district. The Board expects the superintendent to work closely with building level administrators in studying the needs of the schools and recommendations are consistent with those needs. Building administrators are expected to confer with their staff advisory committees to obtain information on needs and priorities.

The Board formulates the annual budget through a committee structure and solicits comments and recommendations from parents and community members. The Board members present their budget to the Board of Finance prior to presenting it to the community at a public hearing. In developing the 2008-09 school budget, members of the Board and the Administration set the following staff and program priorities: maintain current programs and services; expand the concept of inclusion in the regular classroom; emphasize the use of technology consistent with Brooklyn's Long Range Technology Plan; maintain a curriculum consistent with the performance standards listed in Connecticut's K-12 Curricular Goals and Standards; and continue the comprehensive pre-school program for students ages three and four in order to provide an opportunity for every preschool child to have a solid foundation for their educational career.

**Percent of Students with Disabilities Meeting State Goal.** The Goal level is more demanding than the Proficient level, but not as high as the Advanced level, reported in the No Child Left Behind Report Cards. These results are for students attending district schools who participated in the standard assessment with or without accommodations for their disabilities. Results for fewer than 20 students are not presented.

- **Connecticut Mastery Test (CMT), Fourth Generation.** The CMT reading, writing and mathematics tests are administered to students in Grades 3 through 8, and the CMT science test to students in Grades 5 and 8.
- **Connecticut Academic Performance Test (CAPT), Third Generation.** The CAPT is administered to Grade 10 students.

Accommodations for a student’s disability may be made to allow him or her to participate in testing. Students whose disabilities prevent them from taking the test even with accommodations are assessed by means of a list of skills aligned to the same content and grade level standards as the CMT and CAPT.

Federal law requires that students with disabilities be educated with their non-disabled peers as much as is appropriate. Placement in separate educational facilities tends to reduce the chances of students with disabilities interacting with non-disabled peers, and of receiving the same education.

**SCHOOL DISTRICT IMPROVEMENT PLANS AND ACTIVITIES**

---

The following narrative was submitted by this district.

As a result of our scores on the 2007 CMTs, we began the 2007-2008 school year with a school-wide goal to increase the academic achievement of all students, specifically in reading. We trained staff members in the use of data to analyze student progress, we asked team/grade level staff members to use their planning meetings to review student performance and plan appropriate instructional activities and we asked our remedial reading teachers to spend time in the regular classrooms modeling instructional practices. Finally, we increased the time for collaboration between our remedial/developmental reading teachers and our classroom teachers in order to address the needs of struggling readers. Although student performance has improved, we plan to continue these activities with our reading coordinator to work with all classroom teachers in grades K through 4 to help provide both the vertical and horizontal alignment of instruction and the coordination necessary to guide reading instruction in a comprehensive manner.

In the area of special education, our focus has been on inclusion of all special needs students in the regular classroom program when possible thus increasing the time with non-disabled peers. This has been accomplished by an increase in the use of trained paraprofessionals working with individuals or small groups of students in the regular classroom under the supervision of the classroom teacher and the special education instructor.

Other areas of emphasis during the 2007-2008 school year have been professional development for staff and workshops for parents. Examples of the programs provided at parent workshops are: Models of Service Delivery in Brooklyn; Inclusion- Vision and Goals; and Understanding the IEP Form.

Our efforts to involve parents and community members in the review of school programs and the planning and/or improvement of school programs include the following:

- The Brooklyn Collaborative for Young Children –parents and staff members of students in our early childhood programs who meet monthly to explore ways to broaden the interest in and support for the education of young children. This group has been in existence for more than six years and has been a valuable asset to the school system through its support of our pre-school programs.
  - Parent/Staff Teams—the principal at the elementary school has both established a team of parents and teachers to meet and discuss issues that are important to the planning and operation of their building. This team has been able to look at issues objectively and frequently are able to provide guidance which helps to resolve problems and/or prevent issues from becoming problems.
  - Cooperative High School Planning Committee—a committee involving parents, community members, superintendents of schools and elected officials have been meeting since the fall of 2005 to explore a partnership for high school education between Brooklyn and Region 11. Through the development of a cooperative agreement between the parties, Brooklyn committee members have explored their own school system and their goals and plans for education in this community for students from. Pre-K through grade 12.
-
