STRATEGIC SCHOOL PROFILE 2010-11

Windsor School District

ELIZABETH E. FESER, Superintendent

Telephone: (860) 687-2000

Location: 601 Matianuck Avenue

Windsor, Connecticut

Website: www.windsorct.org/boe/

This profile was produced by the Connecticut State Department of Education in accordance with CT General Statutes 10-220(c) using data and narratives provided by the school district, testing services, or the US Census. Profiles and additional education data, including longitudinal data, are available on the internet at www.sde.ct.gov.

COMMUNITY DATA

County: Hartford

Town Population in 2000: 28,237 1990-2000 Population Growth: 1.5%

Number of Public Schools: 7

Per Capita Income in 2000: \$27,633

Percent of Adults without a High School Diploma in 2000*: 12.7% Percent of Adults Who Were Not Fluent in English in 2000*: 1.3% District Enrollment as % of Estimated. Student Population: 85.7%

District Reference Group (DRG): D DRG is a classification of districts whose students' families are similar in education, income, occupation, and need, and that have roughly similar enrollment. The Connecticut State Board of Education approved DRG classification for purposes of reporting data other than student performance.

SCHOOL DISTRICT DIVERSITY

Student Race/Ethnicity				
Race/Ethnicity	Percent			
American Indian	3	0.1		
Asian American	170	4.7		
Black	1,723	47.7		
Hispanic	507	14.0		
Pacific Islander	2	0.1		
White	1,096	30.3		
Two or more races	112	3.1		
Total Minority	2,517	69.7		

Percent of Minority Professional Staff: 10.8%

Open Choice:

6 student(s) attended this district as part of the Open Choice program. Open Choice brings students from urban areas to attend school in suburban or rural towns, and students from non-urban areas to attend city schools.

Non-English Home Language:

7.8% of this district's students (excluding prekindergarten students) come from homes where English is not the primary language. The number of non-English home languages is 37.

EFFORTS TO REDUCE RACIAL, ETHNIC, AND ECONOMIC ISOLATION

Below is the description submitted by this school of how it provides educational opportunities for its students to interact with students and teachers from diverse racial, ethnic, and economic backgrounds.

Windsor is fortunate to have a very diverse student population, and the schools take great pride in this diversity. Within the school community, deliberate efforts are made to insure all racial and ethic groups are reflected in academic programs, extra-curriculars, leadership positions, etc. Windsor students have participated in magnet schools for over a decade. Students participate in programs that involve students from other districts, such as, the Center for Creative Youth and Camp Anytown. Our students also participate in regional and state competitions, e.g., Robotics and Math Team, which provide opportunities for them to work and learn with students from diverse backgrounds. Several Windsor High School students attended the Minority Student Achievement Network student conference, Un Sueno Hecho Realidad: A Dream Come True. A concerted effort has been made at the high school to increase the number of students of color in Advanced Placement courses while increasing performance. The numbers have increased as well as the percent of students achieving a 3 or better on the AP exams. Windsor has as one of its primary goals the reduction and ultimate elimination of the achievement gap. Specific professional development aims to increase cultural competency and teaching quality. Training for cohorts of teachers continued in Effective Teaching Strategies and teaching a rigorous curriculum. Several teachers attended conferences/programs related to diversity, race and cultural competency, including the New England Conference on Multicultural Education and Culturally Responsive Education. Windsor is a member of the Minority Student Achievement Network (MSAN), a coalition of 25 suburban-urban districts from across the country working to eliminate the achievement gap in their districts. MSAN focuses on four areas: math, literacy, conversations on race and student/teacher relationships. Several staff members attended mini conferences/institutes on Promising Practices to Support English Language Learners, Creating Culturally Competent Classrooms and Teachers, and Making a Difference: Promising Practices in Parent Involvement and Community Engagement. Finally, as part of its commitment to employ the most qualified staff and to provide quality educational experiences and learning opportunities for all students, the district actively works to recruit, employ and retain staff of color.

STUDENT PERFORMANCE

Connecticut Mastery Test, Fourth Generation, % Goal. The Goal level is more demanding than the Proficient level, but not as high as the Advanced level, reported in the No Child Left Behind Report Cards.

EQUITABLE ALLOCATION OF RESOURCES AMONG DISTRICT SCHOOLS

Below is the description submitted by this district of how it allocates resources to insure equity and address needs.

The allocation of resources for the Windsor Public Schools is divided into two major functional areas: personnel and non-personnel. With respect to personnel, the district insures equity by allocating teacher positions based on Board of Education guidelines for teacher-student ratios and based on student need. Class-size guidelines and support staff ratios vary by educational level – elementary, middle and high school. Staff allocations are adjusted within the budgetary constraints when these guidelines are exceeded. The district allocates non-personnel resources – supplies, materials, instructional equipment, and replacement textbooks – on a per pupil basis differentiated between elementary and secondary levels. Resources are also allocated based on greatest need, e.g., the demand for intervention programs may be greater in one school versus another because of the needs of students. Maintenance and capital programs are developed and allocated across the district on a needs basis, insuring that major maintenance and capital needs of each facility are appropriately met.

SPECIAL EDUCATION

	Mathematics	8.3	15.8	34.2	49.5
	Science	8.8	13.1	33.9	47.0

For more detailed CMT or CAPT results, go to www.ctreports.com. To see the NCLB Report Card for this school, go to www.sde.ct.gov and click on "No Child Left Behind."

Participation in State Assessments of Students with Disabilities Attending District Schools			
CMT	% Without Accommodations	18.5	
	% With Accommodations	81.5	
CAPT	% Without Accommodations	9.1	
	% With Accommodations	90.9	
% Assessed Us	ing Skills Checklist	11.0	

Accommodations for a student's disability may be made to allow him or her to participate in testing. Students whose disabilities prevent them from taking the test even with accommodations are assessed by means of a list of skills aligned to the same content and grade level standards as the CMT and CAPT.

Federal law requires that students with disabilities be educated with their non-disabled peers as much as is appropriate. Placement in separate educational facilities tends to reduce the chances of students with disabilities interacting with non-disabled peers, and of receiving the same education.

SCHOOL DISTRICT IMPROVEMENT PLANS AND ACTIVITIES

The following narrative was submitted by this district.

The primary goal of the Windsor Public Schools continues to be: Increase achievement for every student in the academics giving particular attention to literacy, and reduce and ultimately eliminate the disparities in performance within all groups of students. Work toward this goal is ongoing in the system. Windsor's focus on rigorous, aligned curriculum, quality teaching, and analysis of data from the school to the classroom level is helping to address student needs and increase achievement. The district has implemented an instructional, building and a district level Data Team structure. The District Data Team is charged with the development of the District Improvement Plan based on BOE goals and objectives. Each school also develops a School Improvement Plan aligned with the District plan. Use of common formative assessments are increasing at every level and teachers are using data more frequently resulting in instruction being modified based on student need. In literacy at the elementary level, a 30 minute interactive vocabulary instruction block has been implemented. In mathematics, the Connected Mathematics program has been fully implemented in the middle school, and an Algebra I lab at the high school is available for students in need of additional support. A major professional development initiative was expanded providing training for teachers in Effective Teaching Strategies. Scientifically Research Based Instruction/Interventions were implemented and monitored for effectiveness. The Pupil and Special Education Services (PSES) department has focused on priority areas related to improving student achievement. We have been working with special education teachers to improve their skill in providing targeted reading interventions to students with disabilities. Training in multi-sensory approaches to reading has been provided and instruction implemented to identified students. Assistive technology training and technical assistance has been provided to staff to further support their skill and application of assistive technology to help students to access the curriculum. Specific software programs have been added for individual students, to help with written expression as well as to support students who can understand content area information but are not able to read on grade level. The department has worked with all schools to revise the Student Assistance Team (SAT) process to align with SRBI. Special education staff has been trained in writing Individual Education Plan goals and objectives to assure instructional alignment with the required curriculum framework for each grade and subject area. In an effort to increase the number of students graduating in four years, an on-line recovery program is available at Windsor High School. Students work to regain credit in courses in English, math, science, social studies and a few electives. The program is also being used by special education high school students enrolled in an alternative program. Windsor is the recipient of a five-year, \$600,000 grant - Project Opening Doors - whose goal is to strengthen the AP program, and increase AP enrollment and performance on AP exams. The district has worked to increase the number of students taking Advanced Placement courses and the number achieving a score of 3 or better. The results have shown a yearly increase in the number of students taking AP, including students of color, and an increase from 42% to 72.3% of students achieving a score of 3 or better. Windsor was the recipient of a \$140,000 competitive 21st Century Skills Grant that provided for SmartBoards, student response systems, GPS units, and professional development for the integration of these and other technologies, such as Moodle, into the grade 6-12 Social Studies curriculum. The PowerSchool parent portal in the middle and high schools enabled parents to monitor student progress by accessing information on attendance, grades and assignments. The Superintendent met monthly with PTO Presidents, and parents are invited to serve on school and district-based committees. The Board of Education held public forums on the proposed consolidation and reorganization of the elementary system that called for closing the Early Childhood Center, establishing two primary and two upper elementary schools, and the implementation of full-day kindergarten. The Board of Education voted in Match 2011 to approve the reorganization plan to go into effect for the 2012-2013 school year.
