### EFFORTS TO REDUCE RACIAL, ETHNIC, AND ECONOMIC ISOLATION

Below is the description submitted by this school of how it provides educational opportunities for its students to interact with students and teachers from diverse racial, ethnic, and economic backgrounds.

The Brookfield Public Schools is committed to reducing racial, ethnic, and economic isolation through local and regional school and district programs. District schools continue to provide opportunities for students' and staff's participation in activities that demonstrate this commitment. Programs were offered during the school day, after hours and during summer months. In addition, Brookfield participates in the Western Connecticut Academy of International Studies Elementary Magnet School with 43 district students enrolled in that program. In-district programming has included PTO sponsored activities and presentations designed to provide students with culturally diverse points of view. The middle school has implemented "Rachel's Challenge" and our elementary schools continue to integrate "Responsive Classroom" strategies as part of their character education programs. Issues pertaining to awareness of racial, ethnic and economic isolation, and increased attentiveness to diversity, continue to be addressed through the district's curriculum revision process. Many of the district's instructional units provide a global focus. Literature selections throughout the grade levels promote understanding and appreciation of differences. The district continues to address the needs of students meeting the profile of English Language Learners through provision of remedial services.

### EQUITABLE ALLOCATION OF RESOURCES AMONG DISTRICT SCHOOLS

Below is the description submitted by this district of how it allocates resources to insure equity and address needs.

The Brookfield Board of Education has established four distinct school facilities in the district – one primary school, one elementary school, one middle school and one high school. The budget development process begins with common district goals tied to the district's five-year strategic plan. These goals help staff set priorities for their schools. Overall, the process is building-based with significant input from administrators, staff and the community. Equitable distribution of the district's resources is a criteria used throughout the process as each school builds its budget to meet school and district goals and meet the staffing requirements based on enrollment projections. Each school receives resources that are equitable for major initiatives, staffing, and equipment replacement. Throughout the process there are checks and balances to ensure equity. The building principals and school staff meet with curriculum leaders, principals meet with the Superintendent, and the Board ultimately reviews, revises, and recommends the budget to the town. This process ensures that the budget is allocated appropriately and the resource allocation reflects the priorities and goals of the Board of Education.

**Percent of Students with Disabilities Meeting State Goal.** The Goal level is more demanding than the Proficient level, but not as high as the Advanced level, reported in the No Child Left Behind Report Cards. These results are for students attending district schools who participated in the standard assessment with or without accommodations for their disabilities. Results for fewer than 20 students are not presented.

- Connecticut Mastery Test (CMT), Fourth Generation. The CMT reading, writing and mathematics tests are administered to students in Grades 3 through 8, and the CMT science test to students in Grades 5 and 8.
- Connecticut Academic Performance Test (CAPT), Third Generation. The CAPT is administered to Grade 10 students.

Accommodations for a student's disability may be made to allow him or her to participate in testing. Students whose disabilities prevent them from taking the test even with accommodations are assessed by means of a list of skills aligned to the same content and grade level standards as the CMT and CAPT.

Federal law requires that students with disabilities be educated with their non-disabled peers as much as is appropriate. Placement in separate educational facilities tends to reduce the chances of students with disabilities interacting with non-disabled peers, and of receiving the same education.

#### SCHOOL DISTRICT IMPROVEMENT PLANS AND ACTIVITIES

The following narrative was submitted by this district.

Brookfield's four schools actively engage staff and parents in a program of continuous improvement to support the district mission, vision and goals. Instructional, School and District Data Teams and SRBI teams address student progress monitoring and data analysis to improve instruction. Parents and community members have multiple opportunities to engage faculty and administrators, including Open Houses, parent workshops and conferences with teachers and school counselors. Brookfield schools encourage participation of volunteers in our schools, and they play an active role in supporting students and teachers as well as sponsoring and planning activities and recognition opportunities. Parents are informed through regular home/school communication via E-news; school newsletters; parent workshops; and district, school and teacher websites. In addition, our schools are dedicated to improving special education programming and services for our students identified with disabilities. Special education teachers and specialists collaborate with general education staff as a regular and on-going part of the school day. The special education department has conducted professional development activities designed to improve special education programming and outcomes for students. Initiatives have occurred at all grade levels relative to improving special educators' skills in the teaching of reading to increase students' literacy skills and overall student achievement. Students with special needs in our middle school continue to make adequate yearly progress by demonstrating growth each year on state assessments. Through co-teaching opportunities, and inclusionary practices, students with disabilities are integrated to the maximum extent possible into general education classrooms. Child study teams at all levels support collaboration between special education and general education as pre-referral strategies are developed for individual and groups of students. Brookfield High School offers an elective course that permits sighted students to experience and become proficient in the use of Braille, which supports a rich environment in which students with disabilities could work collaboratively with non-disabled peers. There is an active Special Education Parent Teacher Association in the district partnering with district staff for both education and support.
